

Overview

LUMENTENDER is a richly featured, cloud-based platform for the Scheduling, Control, and Management of supported* API-based, Internet Connected lighting control systems. The intuitive, neumorphic user interface is designed to provide Owners, Maintenance, and Administrative personnel with simple, powerful control over their lighting systems from any web connected device. The service requires proper network configuration by an ISP or other IT Personnel, and a yearly or multi-year subscription after a standard, no credit card required 30-day free trial.

LITE	PLUS	PRO	Feature Description
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Lumentender Controls Support We host a free In-app chat bot, live chat and email support from 10am-6pm EST. Paid hourly/daily on-site and remote commissioning services are available through Lumentender Control Solutions Inc. and our authorized support network. Travel Terms may apply. Contact us for a quote.
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Daily Event Module™ Create your Typical Daily or Weekly schedule using our elegant, fluid user interface. Our Daily Event module empowers you to quickly and easily schedule your Lumescene™ event/s by day or days of the week based on your device's real-time clock and/or astronomical events.
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Special Event Module™ Create your Special Event schedule by choosing your event's day/non-consecutive days/range of days or by using our pre-populated, filterable Auto-Occasion Library , which is packed with national, international, religious, and charitable holidays with smart recurring logic to assist with floating occasions each year. You can also create your own special occasions by using our simple rules-based scheduling option.
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Play Now Module™ Our Play Now module will enable you to instantly play back your static or animated Lumescenes. View your static lighting scenes by snapshot, your animated light shows by video gifs, taken from a mobile device or uploaded from desktop. Sort them all by logical category or find them by keyword search. Play Now puts you in real-time control.
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Instacolor Module™ Take instant control over your lighting system by selecting groups of fixtures by type (RGB, RGBW, dynamic white, and more*) and instantly change their Color, Hue, Intensity either live or in the blind. Name, take snapshots, and save your favorite settings to your palette for instant recall.
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Custom Lumescene Creator™ Create your own custom Lumescenes™. Choose your Lumegroups™, set their Color, Hue, and Intensity. Name, take snapshots, and save your favorite Lumescenes for use in our Play Now, Scheduling or Combo modules.
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Lumescene Combo Creator™ Our Lumescene Combo Creator delivers a simple, yet powerful tool for multi-site scheduling and control. This module allows you to make combinations of Lumescenes within a single control system if using separate Lumescenes for different zones, or link multiple controllers' similar scenes together. Once linked in a Lumescene Combo™, that single item becomes available to the Play Now and Daily/Special Event Scheduling module. The Linked Lumescenes will be triggered according to their geographical location for the ultimate in functionality.
